SUMMARY

I'm currently a sophomore studying Software Engineering at RIT, with the goal of becoming a professional Software Engineer post graduation. I enjoy all aspects of developing software, from designing, all the way to debugging, and maintaining. I especially enjoy working alongside others who share my enthusiasm for building software.

EXPERIENCE

Founder & Software Engineer, [Antumbra](#)

Wellesley, MA/Rochester, NY - Jun. 2014 - Present

Core member of Antumbra, which was launched after winning AngelHack Boston 2014, with our ambient monitor backlight Glow.

- Worked with other team members on core business strategy and organization
- Developed Windows client for Glow device
- Designed and Developed Antumbra website

R & D, [PadLoc LLC](#)

West Natick, MA — Jan. 2012- June. 2014

Worked as a part of a small team on designing and building a project named 'Air-loc' designed to provide an invisible fence for wirelessly connected devices.

- Prototyped with different technologies including DD-WRT, Arduino, ZigBee, Raspberry Pi, and BeagleBoard

Senior Project, Wellesley High School

Wellesley, MA - Mar. 2013 - Jun. 2013

Worked closely with Computer Science teacher Dr. Robert Cohen in creating a new Introduction to Computer Science course to prep future Wellesley High School students for the Java based A.P. Computer Science course.

EDUCATION

Rochester Institute of Technology -

B.S. Software Engineering

Considering an application domain in Computer Security, and a minor in Free and Open Source Software

SKILLS

- Intensive experience in using Java, Python, and Shell scripting
- Substantial experience using Ruby, C#, C, and versioning control systems
- Knowledge of various static site generators leveraging HAML, SCSS, Coffeescript, and basic web languages (HTML, CSS, JS)
- Experience developing on Linux, OS X, and Windows Systems
- Knowledge of several design paradigms and design patterns
